It looks like a very slick piece of work!

Definitely one of the best looking Java apps I've seen for a while, and I've seen a lot.

Hans Muller, Sun Microsystems

## 1. Introduction

Dear UltraMixer Fan,

thank you for choosing UltraMixer! This User Guide will support you while you are taking your first steps with UltraMixer, and it will introduce you to the numerous opportunities of UltraMixer.

UltraMixer was developed by DJs to be used by DJs. The result is an Audio-Mixing-Software, which doesn't only contain many functions. In addition, it offers a clearly structured and intuitive user interface.

UltraMixer is suitable for people who are interested in music and who want to get to know the world of a DJ...for people who own a bar or a restaurant, and who want to offer music to their guests without putting much effort in it...and for professional DJs and entertainers, who are already experienced in digital mixing.

UltraMixer is the product of an ambitious team of DJs and developers, whom love what they do. We are in close contact with our user, and we try to react to all suggestions and hints. Should you have any questions or suggestions concerning the software or this User Guide, feel free to contact us.

We invite you to be part of the ever growing UltraMixer Community. Have fun and success using UltraMixer!

Happy Mixing!

The UltraMixer Team
