Why is my Denon HC4500 not working with 64 Bit version of UltraMixer?

Geschrieben: **Matthias (UltraMixer)**
Online URL:

64 Bit Software is only supported from ASIO version 2.2 on. The last available driver for HC4500 supports only ASIO of version 1. Unfortunately, it is pretty confusing to have 64 bit drivers that are not working with 64 bit applications.

Solution: Use the DirectX mode of your HC4500 and change the speaker settings to quadrophonic.
